For whom?

The advanced training is primarily aimed at buyers, traders, executives, and directors. Additionally, it is for anyone professionally involved in trading commodities for the production of animal feed and/or investing in the commodities futures markets, focusing on optimal risk management and business strategies.

What you will learn:

The training covers strategies such as basis trading, exchange for physicals (EFP contracts), commodity swaps, and options strategies. After the training, you will be able to assess and further optimize business strategies related to the commodity futures markets for your own business practice.
